ILS-DRIVEN
MAINTENANCE
INTELLIGENCE

End-to-end vessel management

Informed by decades of naval experience. Powered by the future of tech.

LESS COMPLEXITY. MORE CONTROL. ALWAYS MISSION-READY.

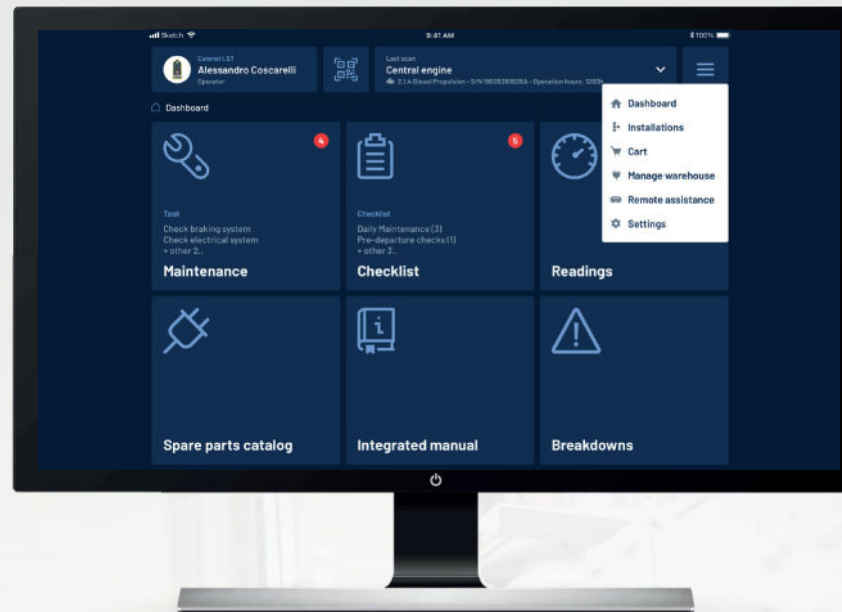

Your Partner in Operational Excellence

Powering real-world naval insight with advanced technology, WAKE unifies maintenance into a single connected system – delivering real-time coordination, predictive planning, and proactive support.

Unlike generic CMMS tools, WAKE was developed with SCIA's naval engineers, ILS specialists, and onboard officers, tailored for military and work fleets. Pre-configured with a complete ILS dataset, the multi-device platform offers flexible plug-and-play deployment, seamlessly integrates with onboard systems, and ensures efficiency across the service chain. The result:

- ~ Reduce downtime
- ~ Extend asset lifespan
- ~ Ensure compliance
- ~ Cut costs

WAKE fuses SCIA's deep naval expertise with next-gen tech to deliver maintenance that's as intuitive as an app, and as powerful as your mission demands.

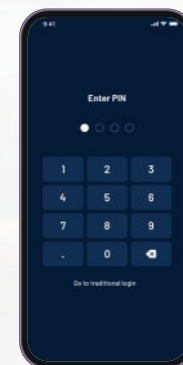

Total Maintenance Oversight. Zero Guesswork.

WAKE connects owners, crews, shipyards, and suppliers – streamlining maintenance, documentation, procurement, workflows, and reporting through an intuitive multi-role digital interface.

Mobile-ready, AI & XR enhanced, and built for seamless legacy system integration, WAKE adapts to any environment and MIL-SPEC data governance requirements – in-cloud or on-prem, full fleet or single vessel.

Driven by real-time data and predictive scheduling, WAKE automates:

- ~ Condition- & time-based maintenance
- ~ Spare parts & warranty management
- ~ Inventory, budgeting & compliance
- ~ Secure, end-to-end data exchange

Proactive Scheduling

ILS-driven system tuned to real usage data for mission-ready reliability.

Smart Logs & Reports

Voice notes, photos & text synced for accurate logs & smarter decisions.

Multi-Role Interface

Intuitive dashboard accessible across desktop, mobile & tablet. Tailored to every user level.

Interactive Manuals

Multi-device access to QR-linked maintenance guides ensures safety & precision.

Inventory & Budgeting

Track inventory, manage procurement & control costs in one interface.

Real-Time Data

Synchronised workflows across all departments – from deck to HQ.

Spares & Warranty Management

Fast ID, ordering & tracking of critical parts – powered by lifecycle data.

AI & XR Training

Guided workflows, immersive tools, and remote support onboard 24/7.

Military-Grade Security

Biometric or PIN access. Cloud or on-prem. Built for MIL-SPEC security.

in collaboration with

SMARTER MAINTENANCE. MAXIMUM PERFORMANCE.
The right data, the right parts & the right training – anytime, anywhere.

Built to follow your fleet.
