

WELL Certifications

With Nuvap

About us

In 2025, Nuvap will join the iComfort solution, enhancing the range of products and services dedicated to IAQ (Indoor Air Quality). This integration opens up new opportunities to improve the well-being and efficiency of workspaces, reinforcing iComfort's role as a technology partner of choice.

iComfort is an innovative SME that believes only a just transition can generate truly sustainable change for the future.

We are at:

- Roma
- Milano
- Bari
- Cosenza

To improve our software solution, we work with:

A.I.oT Ecosystem

From data to action, in continuous learning

750.000 m² of indoor areas analyzed

Of which

15,500 sensors

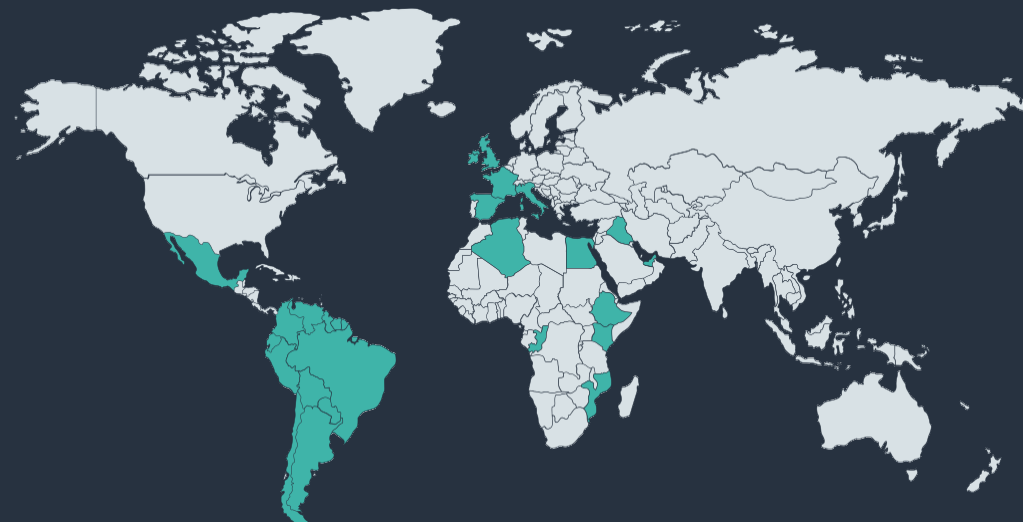

**Installed and managed
on the various customers**

+ 6.000 sensors **+ 180**

Managed in real time

+ 180

Types of integrated sensors

Common Challenges

If you deal with sustainability certifications, you have probably encountered at least one of these situations:

Missing or incompatible data

that slow down or block audits.

Loss of time

Valuable time spent manually compiling complex reports.

Communication difficulties

between customers, consultants and auditors who further complicate the work.

The solution

This is why we have developed a scalable, cloud-based, and open platform, already used by companies, auditors and consultants

 Comprehensive and smart IAQ monitoring	 Occupancy Analytics Advanced
 intuitive Dashboard and digital signage	 User Management
 Automatic WELL reports	 Open system

The benefits of smart IAQ monitoring

- 1 AI predictive algorithms:**
estimate thermal comfort on the basis of occupancy and wall transmittance
- 2 Drift analysis:**
detection of anomalous trends (e.g. increasing humidity but below threshold)
- 4 WELL Credits:**
Direct contribution to WELL Thermal Comfort credits
- 5 Integrations:**
Integration with HVAC and BMS to automatically adjust air conditioning

WELL features

Direct support

- 

Air
(a01, a03, a05, a06, a07)
- 

Thermal
(t01, t02, t03, t04, t06, t07)
- 

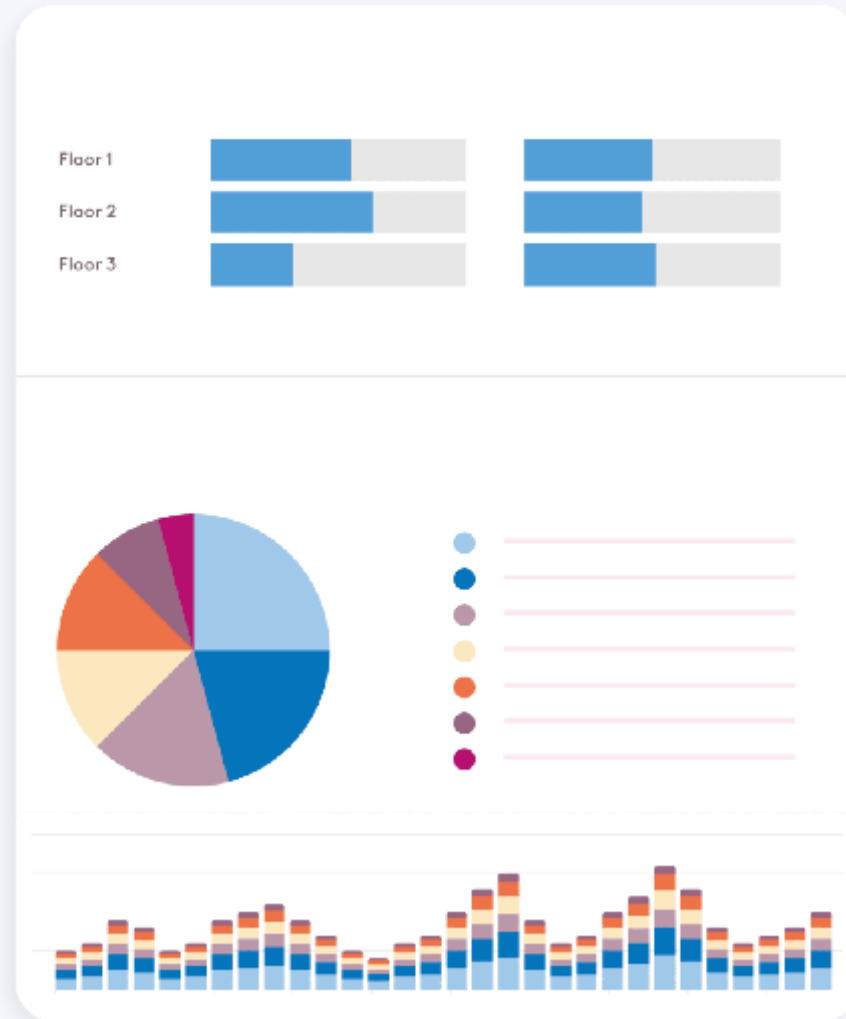

Movement
(v02, v07)
- 

Innovation
(i01)

Indirect support

- 

Community
(c04)

Automatic WELL reports

- Reports preformatted according to WELL guidelines
- Aggregate values for each metric with time detail (day, week, month)
- Evidence of periods of compliance/non-compliance and reporting thresholds
- Documentation already validated by WELL AP

WELL: Mind & Community

Digital Signage for Education and Transparency

Occupancy Analytics to optimize shared spaces

User engagement: notifications, messages, awareness

Support for WELL "Mind", "Community" credits

Advanced Occupancy Analytics

- People counting and flow analysis (people flow, heat-map, queues)
- Real-time occupancy of desks, lounges, common areas
- Integration with GDPR regulations: anonymous data
- Direct support for WELL "Mind" and "Community" credits (transparency, participation)

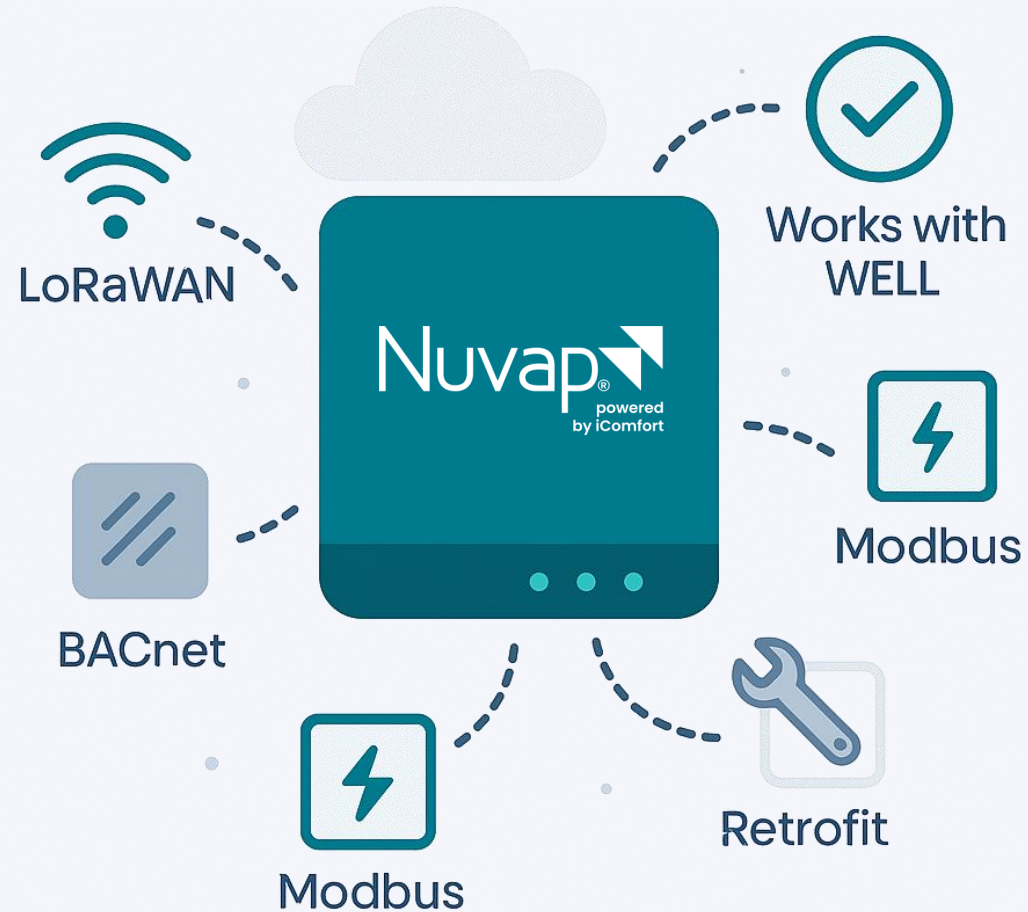

Innovation: Artificial Intelligence

Predictive AI → detects deviations before they result in non-conformities.

Anomaly Detection → Reports abnormal trends and out-of-norm parameters

Automatic alarms → reduce the risk of non-compliance

Unique feature on the market: Built-in AI for WELL

Open system

- Compatibility with multi-brand sensors, including "Works with WELL" devices
- Support standard protocols (LoRaWAN, BACnet, Modbus, MQTT, etc.)
- Cloud platform + on-premise management capability
- Easy retrofit on existing systems and sensors

Success stories

Our customers, consultants and auditors have already experienced these benefits:

01. 20 points WELL

Companies that have quickly earned more than 20 WELL points without any complications.

02. Simplified management

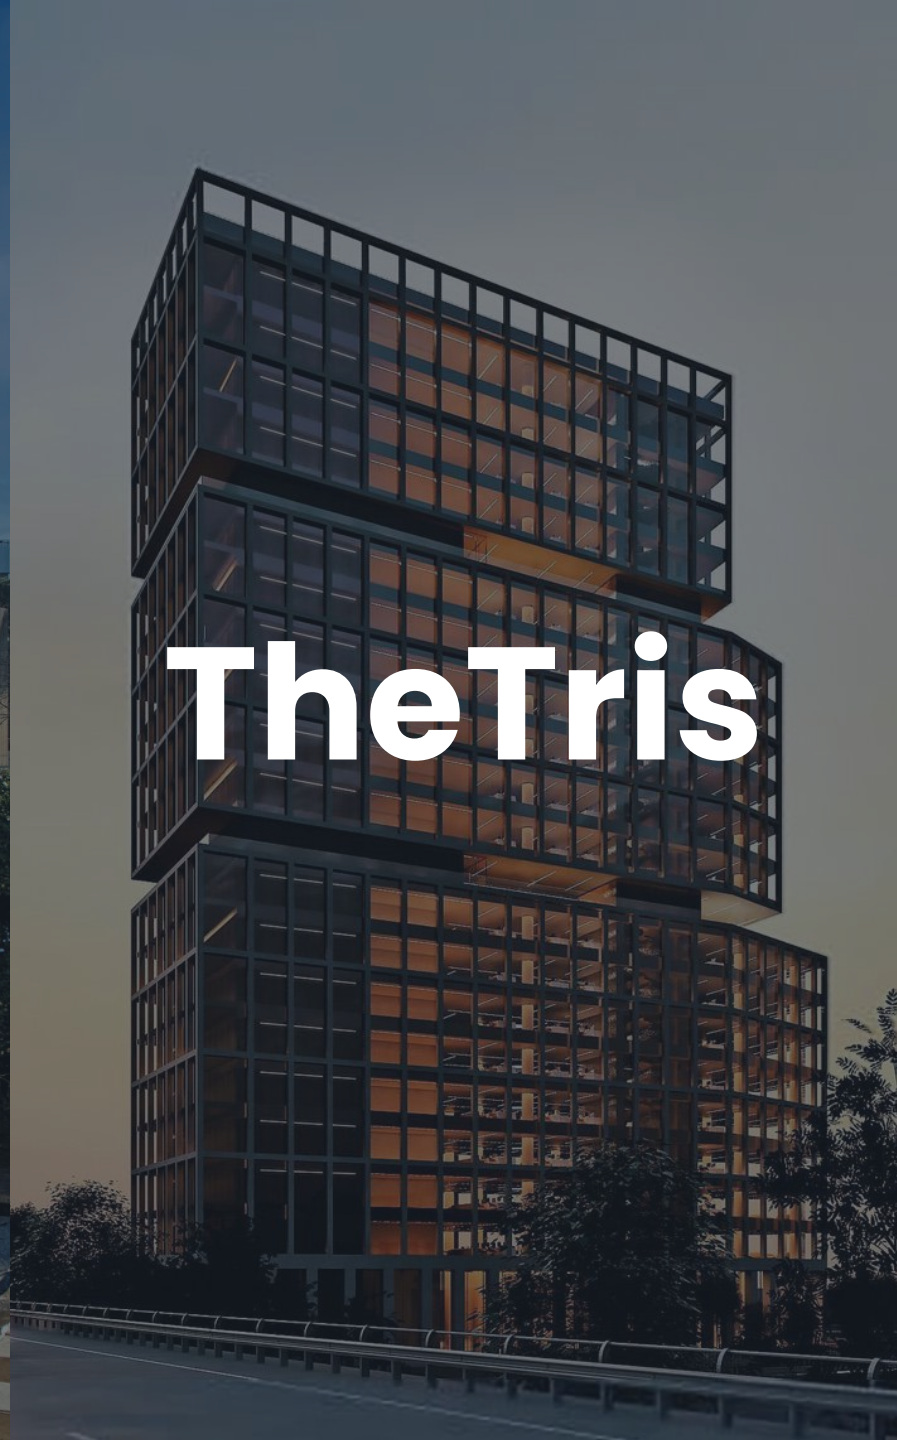

Facility managers satisfied with the simple and clear management of the spaces.

03. Better Integration and Data Privacy

Auditors who can do their job without technical obstacles, with data always available.
