

AI Agents for Your Business

Algho is the no-code platform to create, orchestrate and scale AI agents across your organization. Automate complex workflows, accelerate information search and enhance decision-making. With 400+ integrations (ERP, CRM, databases, ticketing systems...), Algho drives productivity, elevates customer satisfaction and reduces operational costs.

Challenges

Uneffective and non-scalable Customer Support reduce customer satisfaction and business opportunity.

Inefficient manual repetitive task slows down organization productivity.

Information Search fails delivering inconsistent results lacking proper context and accuracy.

Complex AI Adoption requires specialized technical skills and significant investments to integrate it with ICT infrastructure.

AI Output Control is difficult with standard solutions lacking tools to manage tone of voice, brand consistency and contextual sensitivity.

Data Privacy & AI Accessibility requires strong policies and governance tools to avoid uncontrolled data exposure.

Unexpected GenAI costs make organizations struggle with budget forecasting for AI implementation and scaling.

Solution

Easy to use no-code platform allows organization to start their AI projects without technical expert involved.

Powerful information extraction capabilities to provide users the most accurate and contextualized data they need.

Process Automation and Integration tools ready to automate tasks across multiple software solutions.

Customizable output options simplify the AI assistants to be consistent with brand tone of voice and communication guidelines.

Privacy & Security compliance enable a trusted use of AI on both internal and external channels.

Dashboards and Automatic alerts supports management to have a clear view about AI and GenAI usage.

Use Cases

CUSTOMER & VISITOR SUPPORT

Always-on AI agents that handle inquiries, assistance, and bookings across all channels. Algho delivers 24/7, multilingual, omnichannel support, improving response times and customer satisfaction.

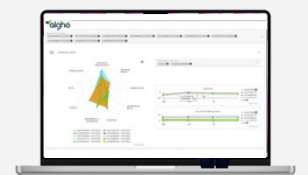

PROCESS AUTOMATION

Algho streamlines operations by combining Process Automation and Document Processing to speed-up information search, reduce manual work and avoid errors.

DECISION INTELLIGENCE

Algho simplifies data access by turning data into real-time conversations. With a simple question, Algho provides specific answers, generating real-time reports, dashboards, and recommendations to enable faster, data-driven decisions.
